Wyoming Environmental Quality Council
172 West 25th Street Herschler Bldg Room 1719
Cheyenne Wyo 82002

Dear EQC Council

this letter is regarding
the petition of the Powder River
Basin Resource Council WQD 2
appendent 8.

This is my concern, as a rancher
and I am opposed to the DEQ
changing any rule for the PRBRC
they do not represent me and I
find it interesting that our tax
dollars are being spent on
something that comes from a group
that is opposed to this kind of a
issue

If we are that concerned about
CBM Water quality, then let the
CBM task force do its job. It
looks like new rules with out
hearing any recommendation from the
CBM task force is not right

the task force was formed to
look at C.B.M. Water issues and to
make recommendations. Those
recommendations are due Oct, 2007

What is there job if their
information is not taken into
this issue.

Thank you for your time, as a
Rancher I love my land and try to take good
of it. Betty Rice
