Dear Sir:

JAN 16 2007

I am writing ^{Terri A. Lorenzon, Director} ~~Environmental Quality Council~~ of the proposed changes to the Water Quality rules to regulate the volume and quality of CBM water discharges.

Wyoming needs to better protect the interests of Wyoming residents (and downstream users) in maintaining the quality and regulating the volume of discharges of CBM water.

Certainly after blundering ahead with no restrictions, the State now has enough experience, knowledge and expertise to prepare a meaningful measure.

Sincerely, Arne J Sandberg
