Environmental Quality Council

WATER QUALITY RULES

To Whom it May Concern:

RE: Responsibility assumed DEQ RE: CBM water
Please implement the rule change

in order to ensure protection of soil,
vegetation, wildlife, livestock, aquatic
life and the downstream landowners
and their existing uses of the land
and to prevent the damage being
caused by DEQ's failure to regulate
CBM discharges.

I personally know of ~~two~~ families
who have gone and are going through
litigation for damage to their property.
One case where their well has dried
up because of CBM. CBM claiming
it was their fault! They have

spent money that they do not have trying to gain a foothold against the money grabbing enormous company's lack of conscience and moral obligation to their fellow persons.

I am beyond understanding this. I am outraged - Please act according to a reasonable request to oversee the residue & consequences of the rapraging of this land in Wyoming

Sincerely, Cynthia A. Mohseni
