Environmental Quality Council

Mr. Mark Gordon
Chairman
Wyoming Environmental Quality Council
122 W. 25th Street
Herschler Bldg., Room 1714
Cheyenne, Wyoming 82002

Dear Council,

Myself and Gus Malli have an outfitting business in the Fornication Area on BLM in the Powder River Breacks south of Arvada Wyoming. I also ranch and have sent a letter for the ranch.

The BLM has not yet been drilled for CBM in the area but the last 5 years we have been less and lcss deer and Elk in the area when we are hunting. 2005 we did not take one hunter because it was so bad in 2004 There is no water in the springs with the drought on and we have seen it. The deer and elk have moved out to water and most of that water is CBM.

I would hate to see the CBM driven out because of unfair rules placed on them that have not been placed on other water discharging companies. The water pumped on the places I am working with is being used by both cattle and livestock.

Thank You,

Jeff L. Sorenson
