Pages to 1 **Re:** Appendix H of Section 20

Follow: Wyoming water quality rules &
 regulations

Urgent **For Review** **Please Comment** **Please Reply** **Please Recycle**

Mr. Gordon

I would like to voice my concerns about the petition By the PRBRC to make changes to Appendix H of section 20 Wyoming water quality rules and regulations.

I am opposed to the proposed section 20 rule change.

This rule change will also cost me my job and thousands of other people their jobs. My family relies on me to provide for them food, shelter clothing not to mention their education.

It will also cost the State of Wyoming millions if not billions of dollars in tax revenues. I believe that state employees are paid their salaries from tax revenues so ultimately it will end up affecting the jobs of STATE EMPLOYEES as well? Where does it stop?

I have been involved in the CBNG industry for 7 years. I have seen numerous beneficial uses for produced CBNG water. When produced responsibly everyone can benefit from this produced water being discharged!

The State of Wyoming should use **science** to make decisions of this magnitude and not be motivated by the emotions of special interest groups like the PRBRC!

I personally have developed wells on lands owned by PRBRC board members. I find it ironic that they continually blast the same industry that pays them royalties from agreements that they have signed. All too often they exaggerate the **facts** in the press. Just a few weeks ago we had a request from a PRBRC board member to give them water for their cattle. Now that's **IRONIC** when they are trying to stop all discharges.

Lets stick to the facts not fiction.

Thanks for your time.
