**RE: Appendix H of section 20, Chapter 1 Wyoming Water Quality Rules and Regulations**

Mr. Mark Gordon,

This letter is to provide comments opposing the proposed rule change(s) with respect to Section 20, Chapter 1 Wyoming Water Quality Rules and Regulations.

Many ranchers in Wyoming have benefited tremendously from CBM discharge water due to drought conditions. Without this ability, Wyoming farmers and ranchers will have a difficult time caring for livestock and crops.

I have been a resident in the state of Wyoming for the last two years. As a parent of three children, I am impressed with how much money the CBM industry has poured into education. As a teacher of 17 years, I know first hand how important it is to have money flowing into the system. Without this money in education, programs that help our children are hindered.

Please consider the how many individuals will be affected without the water produced as a result of CBM development.

Thanks for your consideration on this matter.

Sincerely,

Gina Rougean
