

Mark Gordon,

I am opposed to the proposed section 20 rule changes because it puts my career in jeopardy and I have a family and bills to pay, it will hurt the economy of Wyoming and could Bankrupt, Ranches, Families, business's. I know for a fact that it has help out the Ranchers and farmers due to the water that CBM provides for them and income. I was a water well driller in Sheridan, Wyoming for 10 years before working in the CBM industry, and now visiting with my previous customers that had ranches without CBM and now has CBM development on there ranches really like the water we provide them, They have Healthier cows,crops,ect, it has never been better for them.
