Terri A. Lorenzon, Director  
Environmental Quality Council- 2006

ATT: Environmental Quality Council

Context: Brief statement on water  
quality petition.

Agriculture is the life of Wyoming.  
If our land and water are allowed  
to be mined, everyone will be effected.  
Enforce laws to keep the land and water  
in the hands of the landowners thus  
protecting their way of life.

We the under signed would like to  
see laws enforced that would protect  
our water from any form of  
contamination including being damped  
and transported out of state thru pipelines  
or other water ways. Please enforce laws  
that would allow water for agriculture purposes  
at its present location. Save the land and  
water and save the life of Wyoming.
