George Brown - Manager

**FILED**

FEB 16 2006

Terri A. Lorenzon, Director  
Environmental Quality Council

To Whom It May Concern:

Treater water has been discharged for so many years it has changed the whole ecology of much of Wyoming. It has created year round water in miles and miles of what would otherwise be dry stream beds. And, it has created miles of riparian areas and numerous wet lands.

To lose this water would have a "Tremendous Impact" on not only livestock but wild life including many migratory birds.

Sincerely,  
George Brown
