Re: AQD documentation of Rogers Pit	cc:

Urgent For Review Please Comment Please Reply Please Recycle

Ms. Bush,

We have received both pages of the fax sent today, December 11, 2009. We had not previously received the second page, originally dated December 4, 2009 and addressed to me.

As for confirming the permit assessment date, the correct date is January 2, 2007. We did not receive the application until October 23, 2006. The Air Quality Division does not have information on file regarding the actual production of the Rogers Pit.

For future requests, while we understand you are not conveniently located to access our public files, we do not provide research and copy services to the public. We have accommodated you to the best of our abilities by faxing applications that you have requested. In similar requests to other members of the public we have recommended either sending a delegate to access the publicly available files or making arrangements with the local FedEx/Kinkos. For a fee, they will take the requested files and copy them on your behalf.

Thank you,

Gina Johnson
