Cheyenne, WY 82002

April 30, 2007

We are writing to object to the mining operation, proposed by Telettractors, Incorporated of Pinedale, Wyoming.

The Mocroft Family Partnership leases the state section (lease number 3-8102), where the operation would take place. Our irrigation ditch has always run the length of this section. We worry about the integrity of the ditch, and think that the mining should be further away than the distance now proposed.

We also are concerned about and object to the dreadful length of time planned for this operation. We are being asked to endure chaos, noise, dust and possible pollution for 19 years!

There is already gas production on this section. Cattle grazing certainly seems to be an afterthought, and restoration of grazing land never lives up to expectation.

Sincerely,

Sylvia Sandoval
