Kevin,
I've had conversations in the past with Wendy about this. EPA is only looking for domestic use water supply wells within the AE area. (They want an inventory of everything within 1/4 mile of the AE.) LQD Chapter 11 also has language about "underground source of water" to be protective of all classes of water instead of "underground source of drinking water" that we use. Looks like LQD would be better served if the LQD CH 11 language simply stated "applicable WQD rules", as it does in LQD Chapter 18.
