To BLM ^{Terri A. Lorenzon, Director}
~~Office of~~ Environmental Quality Council

It is of great concern to me that once again archaeological sites, wildlife habitats, geological features and scenic values are under attack by the BLM. The short-sighted thoughts of only oil and natural gas and what can be gained in a very short time. No thoughts beyond the 'now'. What about our God-given gifts of sacred places with untold beauty? Will they (these places) some how "regrow"?

Please reconsider your actions what you do affects generations to come.

This is just a quick fix.

Sincerely

Jeon G. Earnshaw
