Terri A. Lorenzon, Director
Environmental Quality Council

Dear Wyoming EQC:

Please do not allow ~~mining~~ drilling in the Adobe Town Wilderness. Wyoming's wild life and wild places need protection and safety for future generations. Ask you to protect this very rare, uncommon scenic area.

As Tom Strook proposed, we can have it both ways - encourage a healthy business climate as well as protect the environment.

Tourism is part of Wyoming's healthy business climate. Beautiful, uniquely Wyoming places like Adobe Town need to be preserved. Can a less scenic, less crucial wild life area be found for mining? Future economic prosperity may depend on preserving Wyoming's beauty now.

PS: Please see
