Dear Envir. Quality Council,

I strongly urge you to ~~NIX~~ the industrialization of Adobe Town! it's archeological, wildlife, geological + scenic values are priceless. It's vastly illogical to destroy them for short term profit - Including Willow Creek Rim + Badlands flats at the base of Skull Cr. Rim + Powder Rim. Do your job! Protect Our Public lands, wildlife + waters. You work for American citizens - not industry.

Your attention to this most urgent matter would be much appreciated by all present + future generations of all species. Hey - provide Envir. Quality Control!!!

Thank you,
