

MODIFICATION OF AUTHORIZATION TO DISCHARGE UNDER THE  
WYOMING POLLUTANT DISCHARGE ELIMINATION SYSTEM

In compliance with the provisions of the Federal Water Pollution Control Act, (hereinafter referred to as "the Act"), and the Wyoming Environmental Quality Act,

The Termo Company,

is authorized to discharge from the wastewater treatment facilities serving the

Homestead Draw II,

located in the

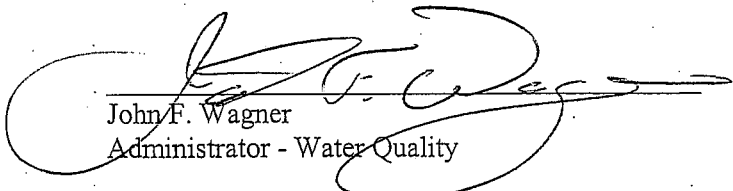

SESW of Section 3 and the SESW of Section 14 in Township 56 North, Range 74 West in Campbell County,

to receiving waters named

three on-channel reservoirs (class 3B) located on unnamed, ephemeral tributaries (class 3B) to Bitter Creek (class 3B) which is tributary to the Powder River in Montana,

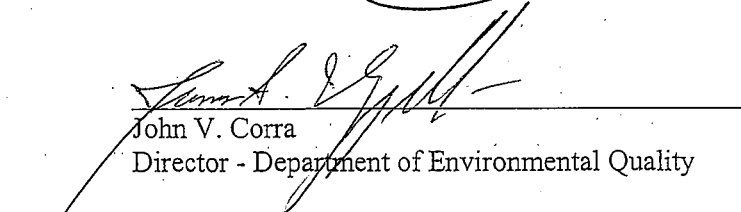

in accordance with effluent limitations, monitoring requirements and other conditions set forth in Parts I, II and III hereof.

The original permit became effective on March 8, 2007. This modification shall become effective on the date of signature by the Director of the Department of Environmental Quality below. This modified permit and the authorization to discharge shall expire on June 30, 2011, at midnight.
